DeVito Internal Medicine & Pediatrics
180 White Road, Suite 201, Little Silver, NJ 07739 | 732-741-3770

Family Household Member Consultation Package Agreement

Package participant full name

Date of birth

Qualifying active member(s) in same household

1. Package and price
This separately purchased package includes two comprehensive medical consultations for $750 per eligible person. The package does not create ongoing membership, establish the practice as the participant's ongoing primary-care provider, or include member portal access. Optional Momentum BioAnalytics testing and services are separately billed (see below).

2. Definition of an eligible family household member
For this agreement, a family household member is a spouse, partner, child, or other family member whose primary residence is the same household as the participating member(s). A college student temporarily living away at school qualifies if that family household remains the student's primary/permanent home address.

3. Membership connection and frequency
Eligibility requires at least one actively enrolled member in the same qualifying family household. Each active member supports eligibility for one non-member participant, subject to office confirmation. Each qualifying participant may use this package once every three years. Eligibility extends to any qualifying family household member, including adult children living at home, provided they meet the household-residence requirements in Section 2. The second consultation must be completed within 60 days of the first consultation date, unless the practice approves an extension at its discretion.

4. Maintain your own primary care physician
Before any package visit is scheduled, I must identify and maintain an established primary care physician (PCP) for routine and ongoing care and sign the acknowledgment below. DeVito Internal Medicine & Pediatrics is providing the two consultation visits only, not ongoing routine care through this package.

5. Member pricing for Momentum BioAnalytics
As long as at least one qualifying family member in this household remains an active concierge member, I may receive the same preferred Momentum BioAnalytics testing prices as members (see website for current testing options and fees). This access is not limited to the period between my two package visits; it lasts while the household-membership eligibility remains in effect. All testing is optional and separately billed.

6. One-time introductory discount
I may receive an additional $50 off the combined AMR + RMR assessment only if that combined assessment is completed between my first and second package consultation visits. The discount cannot be used after the second consultation, and does not extend merely because a household family member remains a member in the practice.

7. Primary-care information

Name of my established primary-care physician

PCP office phone

PCP office fax

8. PCP acknowledgment
I confirm that I currently have a PCP listed above and will continue to use that clinician for regular primary care, prescriptions, chronic disease follow-up and other ongoing needs. The two-visit package is not a substitute for an ongoing primary-care relationship.

9. Clinical limitations and service fees
This package includes only the two consultation visits described above. It does not provide access to additional office appointments, telemedicine visits, preoperative evaluations, vaccinations or other clinical visits at this practice, even for an additional fee. Package participants cannot convert to membership at the end of the second consultation through this package. Any future membership application is separate and subject to the practice's independent enrollment requirements and availability.

10. Medical health insurance
The practice does not participate with private health insurance plans nor with Medicare or Medicaid. We electronically submit private health insurance visit claims, however, reimbursement is not guaranteed. The practice does not participate in Medicare or Medicaid nor can claims be submitted by both the practice and the patient due to Medicare/Medicaid out of network rules.

11. Participant agreement
I have reviewed this agreement, confirm my family household eligibility and active member connection, understand the package includes only two consultations for $750, and agree to maintain my own PCP. I understand that the preferred Momentum rates remain available while a qualifying household member is active, but the extra $50 combined-test discount is limited to completion between my first and second package visits. If the participant is a minor, a parent/legal guardian signs.
